Language

English

Experience

2022 - Current
Entrostat | 25 Scott St, Waverley, Johannesburg, 2090

QA/Automated tester

- Identifying software weaknesses by executing automated test scripts and utilizing variable input to assess various use cases.
- Verifying test outcomes against known software defects to identify areas for further testing.
- Identifying test automation standards when developing tests, running scripts, and analyzing results to meet testing goals.
- Delivering automated test results to project teams for validation and assessment, detailing evaluation criteria and the assessment process.
- Identifying reasons for test failures, adjusting testing parameters and scripts, and retesting to confirm results align with expectations.

2021 - 2022
The Coding Ground | 8 Incubation Dr, Riversands, Midrand, 2021

Student

- Develop multiple websites and applications from start to finish.
- Create new databases using SQL (postgres, mySQL), no-SQL. (MongoDB).
- Collaborate with junior developers to ensure seamless user experiences.
- Participated in daily Scrum meetings to remain up-to-date on the latest software developments.
- Practiced functionalities for creating multiple login pages that allow users to safely access their accounts (JWT).
